

SALIH ELFATIH

Ontario, Canada | salih.elfatih@proton.me | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

FULL-STACK DEVELOPER | AI/ML PRODUCT BUILDER

BRANDING STATEMENT

Highly motivated and product-driven Full-Stack Developer with 3+ years of experience building full-stack web applications, AI-enabled products, and scalable back-end systems. Proficient in Python, FastAPI, React, Next.js, TypeScript, PostgreSQL, and AWS, while turning messy workflows into clean, practical software. Adept at API design, data modeling, automation workflows, authentication, cloud deployment, and AI-assisted development. Recognized for product thinking, clean documentation, Git workflows, accessibility awareness, and reliable end-to-end execution.

CORE COMPETENCIES

Full-Stack Development | AI Integration | API Design | Back-end Architecture | Database Design | Data Workflows | Product Thinking | Automation | Authentication & Security | Cloud Deployment | Testing & Debugging | Git Workflows | Accessibility (WCAG/AODA) | UI/UX Engineering | Technical Documentation | LLM-assisted Analysis

TECHNICAL SOFTWARE & TOOLS

- Programming Languages: Python, JavaScript, TypeScript, PHP, Java, C#, SQL
- Back-End & APIs: FastAPI, Node.js, Express.js, Django, Pydantic, REST APIs
- Front-End & UI: React, Next.js, Vite, Vue.js, Tailwind CSS, shadcn/ui, Framer Motion
- Data & Infrastructure: PostgreSQL, MongoDB, Redis, Supabase, Docker, AWS Lambda, AWS S3, API Gateway, Git, Cloudflare R2
- AI & Machine Learning: PyTorch, TensorFlow, scikit-learn, Hugging Face, RAG, NLP pipelines, OCR/Tesseract
- Development Tools: Claude Code, Codex, Cursor, Postman

PROFESSIONAL EXPERIENCE

Sakia Labs, Remote

Jan 2023 - Present

Founder & Full-Stack Developer

- Designing and building mission-driven full-stack and AI-powered applications from concept to deployment, including product strategy, UI systems, back-end APIs, data workflows, and cloud deployment.
- Built and shipped production-ready platforms using Next.js, TypeScript, Python, FastAPI, PostgreSQL, and cloud-native services.
- Designed scalable REST APIs, schema-driven data models, validation pipelines, authentication flows, and role-based access patterns.
- Integrated AI-assisted workflows for document analysis, resume matching, and recommendation features using NLP pipelines, OCR parsing, and LLM-assisted analysis.
- Implemented background jobs, caching, and object storage patterns with Docker, Redis, AWS/S3-compatible storage, and modern deployment workflows.
- Created accessible, responsive UI systems using React, Tailwind CSS, shadcn/ui, and Framer Motion.

Fanshawe College, London, ON

Jan 2026 - Apr 2026

AI/ML Freelance Developer Co-op

- Completed a structured freelance co-op focused on full-stack delivery, AI prototyping, and technical documentation.
- Scoped project requirements, feature priorities, implementation plans, and portfolio-ready case studies.
- Managed time tracking, roadmap planning, weekly priorities, and iterative delivery across multiple product prototypes.
- Produced GitHub documentation, technical notes, and recruiter-facing explanations for complex software projects.

Hydro One, Barrie, ON

Sep 2021 - Dec 2021

Front-End Developer Co-op

- Supported enterprise front-end development for real-time data visualization and reporting systems.
- Developed responsive React components for real-time data visualization and reporting workflows.
- Collaborated in enterprise development workflows using version control, code reviews, and iterative feedback.
- Translated technical requirements into reusable front-end components with attention to usability and consistency.

SELECTED PROJECTS

Lexi - AI Legal Document Assistant

Apr 2026 - Present

- Built an AI legal document assistant using Python, FastAPI, PostgreSQL, OCR parsing, and LLM-assisted analysis.
- Designed workflows for plain-English lease explanations, clause extraction, risk flagging, and deadline detection.

Nimbley - Smart Grocery & Budgeting Platform

Jan 2026 - Mar 2026

- Developed a full-stack app using Next.js, TypeScript, FastAPI, PostgreSQL, and reusable UI components.
- Implemented product flows for deal tracking, inventory awareness, and budget-aware recommendations.

RezGenie - AI Resume & Job Matching Platform

Sep 2025 - Dec 2025

- Created an ATS-style recruitment platform with resume parsing, candidate scoring, and job-matching workflows.
- Shipped NLP pipelines and deployed the system with Docker, Redis, Netlify, Render, and Cloudflare R2.

TRAINING AND PROFESSIONAL DEVELOPMENT

- Graduate Certificate - Artificial Intelligence and Machine Learning, Fanshawe College, London, ON, Jun 2026
- Advanced Diploma - Computer Systems Technology - Software Development, Mohawk College, Hamilton, ON, Jun 2024
- Bachelor of Fine Arts - Painting, Sudan University of Science & Technology, Khartoum, Sudan, Jan 2018
